PROFILE

Bringing more than 5 years experience programming as a WEB-developer. Skilled in HTML5/CSS, PHP/JavaScript language, RESTful APIs architectural, WordPress CMS (content management system), Laravel framework and any separate PHP service. Proficient in creating or customizing built-in WordPress themes and plugins. Seeking a further career by growing in WEB-developer responsibility.

EXPERIENCE

Freelancer, Sydney, Australia — *Web Developer* — Apr 2021—PRESENT

- Developed `brp-toolbox` WordPress plugin, that includes:
  (1) `retrieve-WooCommerce-coupon` service (retrieve WooCommerce coupon after failed use like `purchase failure`). **(2)** `redirect-page` service (based on `geolocation-ip-detection` plugin). **(3)** `subscriptions-planing` service (based on `WooCommerce-subscriptions` plugin along AJAX-features). **(4)** `order-shipping-cost` service (calculate `shipping-cost` of products based on `Australia-postcode`). **(5)** `Sender` service (sending an SMS after creating an order by customer based on the `Sendinblue` and `Cellcast` services). **(6)** `Tracker` service (logs anything in WordPress).
- Created `gf-api-toolbox` WordPress plugin (generate customized APIs with `Basic-auth` authenticate based on `gravity-form` plugin).
- Created `show-variations-image` WordPress plugin (adds feature for changing between images when switch variations' product on the WooCommerce product page).
- Created `generate-alt-tag` WordPress plugin (auto-generate `alt-tags` of images).
- Developed `register/login system` on `Laravel framework`.

ZHAKET, Tehran, Iran — *PHP Developer* — Dec 2020–Apr 2021

- Developed the WordPress themes and plugins by using WordPress & WooCommerce & Elementor Hooks and Filters.

JABIZPARDA, Tehran, Iran — *Web Developer* — Apr 2019–Dec 2020

- Inserted `WooCommerce` products via `REST API`, and created `CRUD` operations via coding `SQL` query on the `WordPress`.
- Customized `themes` and `plugins` via writing of code.
- Created `pages`, `posts`, `landing-pages` etc. by using page builder plugins like`Site-Origin/WP-bakery/Elementor`, also templates and custom post-type via coding and making related it by the `ACF` plugin.
- Installed WordPress, theme and plugins on preset of environment or along with configure host.
- Created a chatbot plugin on `Magento2`.

PROJECTS

WP Plugin Starter *(WPS)* — August 2021—PRESENT

I have been developing the `WP-plugin-starter` based on WordPress plugin structure.
